Education

Harcourt Butler Technical University

B.Tech in Information Technology (CGPA: 8.45)

Kanpur, Uttar Pradesh

Dec 2020 – May 2024

BNS School

Intermediate (PCM) – 90.2%

Varanasi, Uttar Pradesh

Jul 2017 – Apr 2019

Experience

TATA Consultancy Services

Backend Developer

Jul 2024 – Present

Bhubaneswar, India

- Developed high-performance backend services for **OmniStore™** Data Management using **Spring Boot** and **Spring Batch**, processing millions of records with optimized batch workflows and multithreaded execution.
- Designed and implemented a data **archival and purging** system using Spring to manage historical data lifecycle, reducing production database load by offloading inactive records to an archive database.
- Achieved over **40%** reduction in SQL query execution time through advanced query optimization techniques and JPA performance tuning, significantly improving system responsiveness.
- Built an **LNE Utility** to retrieve and restore archived data to the primary database on demand, incorporating query optimization strategies that improved data retrieval performance by over **50%** and enabled efficient CSV export for reporting.
- Working on **DataLoader** module using Spring Batch's reader-processor-writer pattern to automate bulk data ingestion with robust validation and transformation logic.
- Identified and resolved 100+ SonarQube issues, enhancing code quality, security, and long-term maintainability.
- Developed and maintained CI/CD pipelines using Azure DevOps, improving deployment reliability and reducing release turnaround time.

Projects

NetflixGPT | (React, Tailwind CSS, Firebase, TMDB API)

GitHub | Live

- Developed a NetflixGPT web application using React and Firebase, enabling secure user authentication and dynamic movie browsing.
- Integrated the TMDB API to fetch and render real-time movie data and built a movie search feature, ensuring seamless UI updates through efficient state management.
- Designed a fully responsive UI to ensure consistent user experience across desktop and mobile devices.

Live Location Tracker | (React.js, Node.js, Express.js)

GitHub | Live

- Developed and deployed a backend service for a Live Location Tracking application using Node.js, Express, and Vercel (serverless).
- Designed RESTful APIs to receive and process real-time location data, enabling continuous tracking updates.
- Handled cross-origin requests and ensured seamless frontend integration through well-structured API responses.
- Optimized server logic for efficient request handling and low-latency real-time data flow.

Achievements

LEETCODE | GFG

- Solved **1500+** **DSA** problems across platforms, strengthening algorithmic and problem-solving skills.
- Achieved a maximum LeetCode contest rating of **1839** (Top 7%).
- Rated 3 on CodeChef** (max rating: **1792**) and 5 on HackerRank.
- Secured **AIR 146** in **TCS CodeVita** Season XI (Round 2) and **Rank 40 in TCS Top 10** Coding Challenge (Oct 2024).
- Worked as a Tutor at **Filo** for 1 year, mentoring students in problem-solving and core concepts.
- Achieved a maximum **rating of 4734** in Google Kick Start (Round G).

Technical Skills

Languages: C, C++, Java, HTML, SQL, JavaScript, Git Github

Frameworks: Node.js, React.js, ManognoDB, Tailwind CSS, Express.js, Next.js, Spring Boot, Spring Batch, React, Node.js

Tools: Git, Docker, Kubernetes, Terraform, Azure DevOps
