Education

Harcourt Butler Technical University
B.Tech in Information Technology (CGPA: 8.45)
BNS School
Intermediate (PCM) – 90.2%

Kanpur, Uttar Pradesh
Dec 2020 – May 2024
Varanasi, Uttar Pradesh
Jul 2017 – Apr 2019

Experience

TATA Consultancy Services Jul 2024 – Present
Backend Developer Bhubaneswar, India

- Develop and maintain **3 Spring Boot microservices** for **OmniStore™ Data Management**, supporting enterprise-scale **data ingestion, archival, purging, and audit workflows**.
- Enhanced the **DataLoader (DL) microservice** to reliably process **full and delta product loads** into the OmniStore database, supporting product data delivery for **7+ customers** while implementing client-requested features and resolving production defects.
- Resolved **100+ SonarQube issues and code smells** in the DataLoader microservice, improving **code quality, maintainability, and development standards**.
- Independently own and maintain the **Archival & Purging microservice**, processing **millions of records daily** by archiving inactive data from the primary database to the archive database and safely purging archived records while maintaining **data integrity**.
- Optimized **JPA entity fetching strategies and SQL queries** in Archival & Purging, achieving up to **40% improvement in query performance** and increasing high-volume archival processing efficiency.
- Independently own and maintain the **Transaction Extractor microservice**, enabling restoration of archived records to the primary database and efficient **CSV-based data extraction** for audit, reporting, and business recovery workflows.
- Implemented **cursor pagination** in Transaction Extractor, reducing **SQL query execution time by 60%+** and significantly improving high-volume data extraction performance.
- Designed and optimized **SQL queries and database indexes** to efficiently process **millions of records** across data ingestion, archival, purging, and recovery operations.
- Built and maintained **Azure DevOps CI/CD pipelines**, streamlining application deployments and improving **release reliability** across microservices.

Technical Skills

Languages: Java, SQL, JavaScript, C++, C

Backend: Spring Boot, Spring Batch, Spring Data JPA, Hibernate, Nodejs, ExpressJs, REST APIs, Microservices

Frontend: React.js, Next.js, Tailwind CSS, HTML

Database: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Azure DevOps, Git, Docker, Kubernetes, Terraform, Maven, SonarQube

Concepts: Batch Processing, Query Optimization, Multithreading, CI/CD, Data Archival, Cursor Pagination, Database Optimization

Personal Projects

NetflixGPT | *React, Tailwind CSS, Firebase, TMDB API* GitHub | Live

- Built a full-stack movie discovery application with **Firebase authentication**, TMDB integration, and AI-powered recommendations using the **OpenAI API**.
- Designed a fully responsive UI with optimized **Redux state management**, ensuring a consistent experience across desktop and mobile platforms.

Live Location Tracker | *React.js, Node.js, Express.js* GitHub | Live

- Developed and deployed a backend service for **real-time location tracking** using Node.js, Express, REST APIs, and Vercel serverless infrastructure.
- Designed RESTful APIs to receive and process real-time location data, enabling continuous tracking updates with low-latency request handling.

Achievements

LEETCODE | GEEKSFORGEEKS

- Solved **1500+ DSA problems** across LeetCode, GeeksforGeeks, and CodeChef; achieved LeetCode max rating of **1839 (Top 7%)** and CodeChef **3-Star (1792)**.
- Secured **AIR 146 in TCS CodeVita Season XI Round 2** and **Rank 40** in the TCS Top 10 Coding Challenge (Oct 2024).
- Achieved a max rating of **4734 in Google Kick Start (Round G)** and **5-Star HackerRank**.
- Worked as a **DSA Tutor at Filo** for one year, mentoring students in data structures, algorithms, and core CS concepts.
